DEFINITIONS OF THE TRADING LOCATIONS FOR WHICH PLATTS PUBLISHES INDEXES OR ASSESSMENTS

All the assessments listed here employ Platts Assessments Methodology, as published at https://www.spglobal.com/platts/plattscontent/_assets/_files/en/our-methodology/methodology-specifications/platts-assessments-methodology-guide.pdf.

These guides are designed to give Platts subscribers as much information as possible about a wide range of methodology and specification questions.

This guide is current at the time of publication. Platts may issue further updates and enhancements to this guide and will announce these to subscribers through its usual publications of record. Such updates will be included in the next version of this guide. Platts editorial staff and managers are available to provide guidance when assessment issues require clarification.

The assessments listed in this guide reflect the prevailing market value of the specified product at the following times daily:

Asia – 11:30 GMT / BST

EMEA – 13:30 GMT / BST

Americas – 23:59 GMT /BST on the day prior to publication

Platts may take into account price information that varies from the specifications below. Where appropriate, contracts, offers and bids which vary from these specifications, will be normalized to the standards stated in this guide.

All other terms when not in contradiction with the below as per London Rice Brokers' Association Standard Contract Terms (September 1997), amended 1 November, 2008. English law to apply.

Crop Transitions

Platts price assessments will always reflect the current crop, unless specified. Because the timing of harvests can vary from one year to the next, the transition from one crop to the next will start as soon as the new crop is assessed as meeting Platts assessment principles. The transition from one crop to the next crop may have a significant impact on price assessments, so Platts will often use a phase-in period during which the new crop is given an increasing weighting in the assessment.

For example, on Vietnam 5% broken white rice, winter/spring crop normally becomes available towards the end of February or early March. As soon as Platts determines that the new crop price assessment is robust enough and meets Platts assessment principals, the transition window will start and run for a period of 10 working days.

On the first day of the transition window, Platts weighted assessment will reflect 1 day of new crop and 9 days of old crop (1:9), with new crop gaining increasing weighting in the assessment as each day passes. On day 10, the last day of the transition window, only new crop will be reflected in the price assessment (10:0). The same weighting approach will be applied to all transitions between crops. Platts will perform crop transitions for main season crops in all origins and reserves the right to conduct crop transitions for secondary and/or tertiary crops, if deemed necessary.

Thai Long Grain Fragrant Rice Pathumthani 100% Grade B FOB FCL (weekly)

Quality: min 60% whole kernels; max 35.5% head rice; max 4.5% brokens and small brokens C1; 3.9-4.5 brokens size 1; 50.00%-79.99% of kernel classified as brokens size 1; 0.0-0.5 brokens size 2; >C1-49.99% of kernel classified as brokens size 2; 0.0-0.1 small brokens C1; 0.25% max damaged kernels; 0.2% max yellow kernels; max 6% chalky kernels; 0.5% red and/or under milled kernels; max 0.2% underdeveloped kernels and foreign matter; max 1.5% glutinous rice; max 5 paddy grains/kg; max 14% moisture content; min 80% purity; average length of whole kernels min 7mm; minimum milling degree extra well milled.

Thai Long Grain Fragrant Rice Hom Mali A1 Super 100% Broken FOB FCL (weekly)

Quality: max 5% small brokens C1; max 15% whole kernels and parts ≥65% of the kernel; min 80% parts <65% of the kernel and not passing through sieve no.7; max 1.5% total while rice or white glutinous rice; max 0.5% small brokens C1; max 0.5% foreign matter; max 14% moisture content.

Thai Long Grain White Glutinous Rice 10% Broken FOB FCL (weekly)

Quality: min 55% whole kernels; max 33% head rice; 70% of kernel classified as head rice; max 12% of grain to be broken and small broken C1; 11%-12% broken size 1; 35.00%-69.99% of kernel classified as brokens Size 1; 0%-70% brokens Size 2; >C1-34.99% of kernel classified as brokens Size 2; 0%-0.3% small brokens C1; max 0.5% Damaged Kernel; max 1.5% yellow kernels; max 2% red and/or under milled kernels; max 0.5% underdeveloped kernels and foreign matter; max 15% white rice; max 10 paddy grains/kg;

max 14% moisture content; minimum milling degree well milled.

Thai Long Grain White Rice 5% Broken FOB Derivatives

Platts publishes Thai 5% Broken WR derivatives assessments for a balance-of-month contract as well as six calendar months, with M1 being the first full calendar month ahead on the date of publication. The assessments reflect an outright price derivatives contract settling on the average of Platts assessments in the named month. The balance-of-month assessment is published up to and including the 15th day of the month, in line with other Platts derivatives assessments.

The new assessments are published using Platts Market on Close assessment methodology, prioritizing bids, offers, and trades in the Thai 5% derivatives market. Additionally, when required, information from other related markets may be considered, including historical spot price trends, extrapolated using a proprietary S&P Global Platts Analytics model.

Vietnam

REVISION HISTORY

April 2022: S&P Global Commodity Insights discontinued its Traditional White, Brown and Parboiled, Pusa White and 1121 White Basmati and Sharbati white rice assessments. It also launched the 1509 Steam and Parboiled, Pusa Steam and 1121 Steam Basmati and Sharbati steam assessments.

February 2021: Platts removed the varietal name from its Uruguayan 5% broken white rice and Parboiled 5% STX assessments.

October 2020: Platts discontinued assessments of Thai White Glutinous 10% Broken (Sanpathong), Thai White Glutinous 100% Broken A1, and Vietnamese KDM Fragrant 5% Broken.

September 2020: Platts migrated the methodology and specifications guide from the 24 pre-existing rice methodology guides published by the Live Rice Index, following that company's acquisition by Platts in September 2019. Platts launched assessments of Thai 5% broken white rice derivatives.
